

## EQUI LIFT

### High-end equine surgery and treatment table

*The EQUI LIFT Surgery Table is our premium equine operating and treatment table for demanding equine clinics and referral centers.*

*Developed together with leading equine surgeons, EQUI LIFT combines a heavy-duty scissor lift mechanism, a fully padded 100 mm memory foam surface and a unique side panel concept to deliver maximum patient safety, flexibility and ergonomic workflow in daily surgery.*

#### Key Features

- Battery-powered height adjustment by joystick in each corner from 415 - 1,165 mm - no separate remote control required
- Heavy-duty scissor lift mechanism with extremely stable, zinc plated and powder coated frame
- Maximum load 1,000 kg with excellent stability for large and heavy equine patients
- 100 mm memory foam padding - no need for additional padding, even for heavy horses
- Removable and re-positionable side panels with step-less gas spring adjustment for optimal patient positioning and surgical access
- Safety switches under each corner and under the head support - help to prevent leg injuries when lowering the table
- Vertical leg support bars locked to the frame - cannot be accidentally pushed out
- Lockable rubber feet and enclosed folding bellow to protect mechanics and simplify cleaning

## Standard accessories (included) for EQUI LIFT

- 4 vertical poles (length 1,700 mm)
- 2 horizontal bars with clamps (length 1,100 mm)
- 4 clamps for belts
- Complete leg support set: 1 padded leg support, 1 locking device and 2 leg support bars
- Infusion bag stand with clamp
- 4 coated foam strips (for head section and side panels)
- 4 wedge-shaped foam padding
- Anesthetic hose support
- Movable accessory rack

## Clinical benefits

- Safe induction, positioning and recovery of heavy equine patients
- Excellent access to the surgical field thanks to flexible side panels and leg support system - suitable for soft tissue, orthopedic and arthroscopic procedures
- Intuitive control concept that keeps the surgeon's hands free
- Robust construction for intensive daily use in referral centers and university hospitals

## EQUI LIFT with X-ray head section

- Head section 85 × 50 cm with X-ray translucent insert
- Ideal for advanced imaging during surgery and dentistry
- Available as factory option or retrofit kit

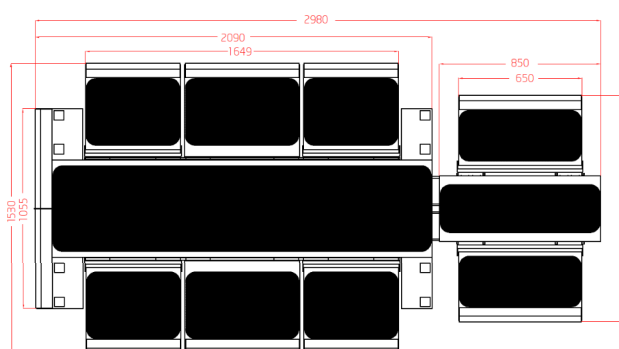

## Optional accessories

- Large Colon Tray - can be placed caudally or laterally
- Orthopedic Leg Support Set (2 pcs.) - for optimal joint flexion and leg positioning
- Additional Leg Support - extra padded leg support
- X-ray translucent head section 85 × 50 cm

## Technical specifications

Specification	Value
Overall table dimensions (L×W)	2,980 × 1,530 mm
Table width excl. side panels	1,055 mm
Head support dimensions (L×W)	850 × 345 mm
Padding thickness	100 mm memory foam
Table weight	approx. 650 kg
Maximum load	1,000 kg
Height range	415 - 1,165 mm
Pelvic tilt angle	± 8°
Head support tilt angle	± 20°
Wheels	ø150 mm
Operation voltage	12 V DC
Battery type	12 V / 55 Ah
Battery charger	12 V / 4 A
Charging time	approx. 5 hours
Full battery capacity	approx. 30 full lifts
Table use during charging	Yes
Surface coating	Zinc & powder coated
Warranty	2 years (5 years on frame)

## Order information

Description	Item code
EQUI LIFT Surgery Table (standard configuration)	770.001
EQUI LIFT Colon Tray, adjustable 80 - 140 cm	602.648
EQUI LIFT Orthopedic Leg Support Set (2 pcs.)	602.649
EQUI LIFT Leg Support (extra, incl. padded support)	602.650
EQUI LIFT X-ray Head Section (85 × 50 cm)	602.653

Power supply: 12V 4A Battery charger

Lifting capacity: 1,000kg
